The Cause of Eye Diseases

MORE than twenty years ago I advanced the theory that Eye Strain is the one great cause of eye diseases — that diseases of the eye which cause blindness are caused by imperfect circulation of blood in and around the eye.

This poor circulation can nearly always be traced to over use or strain of eyes by using them under improper conditions.

The eye has been overtaxed at some time.

When you come to think of it you can probably fix the exact date.

You were sick or nervous and used your eyes more than you should have done—perhaps reading fine print or doing other close work by a poor light.

School children's eyes

The eyes of thousands of school children are weakened and ruined by insufficient light or by having it come from a wrong direction.

The strain thus produced causes an irritation and congestion of the delicate nerves and muscles of the eye and an imperfect blood supply results.

A general weakness of all the nerves and muscles of the eye is the result of this imperfect blood supply and the circulation may be cut off entirely from certain parts.

If from the Optic Nerve the result is paralysis, either partial or complete. If from the lens of the eye Cataract results.

Any other eye disease may result from a like cause according to the part affected.

Injuries to the eyes

An injury will act in the same way by interfering with the natural circulation.

When you consider the intricate mechanism of this delicate organ, with its numerous muscles, nerves and blood vessels, you realize how easily its usefulness may become impaired.

A very unwise thing to do when this condition of strain, weakness and impaired circulation exists is to put on glasses or spectacles.

Glasses are nothing but eye crutches.

Glasses eye crutches

If you overtax any other part of the body weakness results—the circulation becomes impaired and disease often results—but you don't rush off to the crutch maker. Certainly not.

Neither do I advise the use of glasses in one case out of a thousand.

Why fit glasses to weak or strained eyes and not splints and braces to weak or strained nerves, muscles, kidneys, etc.?

While glasses often temporarily relieve, they usually aggravate and make chronic the trouble in the end.

In fact, glasses are usually the worst remedy that can be adopted. Under their constant use the eyes grow gradually weaker and glasses of greater power must be prescribed.

They are, in fact, only a crutch and the eyes grow weaker the longer one depends upon them.

The use of the knife on the eye is equally unwise, unnecessary, and often criminal.

Knife not necessary

Think of the pain, suffering, blindness and even death that has been caused by the use of the knife on the eye.

I discovered several years ago a method of restoring the natural circulation of blood to the eyes which is so simple that a child can apply it.

This method I call the Oneal Dissolvent Treatment.

When this treatment is applied it immediately removes all strain on the nerves and muscles of the eye, equalizing the circulation, thereby assisting nature in restoring the eye to its normal functions.

By its use the eyes are strengthened, brightened and beautified.

Knife operations become unnecessary, and the necessity of wearing glasses is done away with.

Acting on the principle that perfection in specialties is far more desirable than imperfection in generalities, I have devoted a lifetime to the study of diseases of the eye in the leading hospitals of America and Europe.

I have been established in Chicago for many years. I can refer to cured cases of over twenty years' standing.

Treatment to suit the case

I study each and every case thoroughly and prepare treatment to suit the requirements of the case, and my charges are as reasonable as anyone could ask considering the special services rendered and the assurance of a quick and permanent cure.

I make no charge whatever for consultation either at my office or by correspondence.

I am interested in every case of eye trouble and will take pleasure in giving my written opinion free of charge to any one who writes me a description of his case.

I want to hear from the difficult and so-called incurable cases everywhere, and ask that they await my opinion before giving up hope.

The Knife Should Be the Last Resort in All Diseases of the Eye

I long ago adopted this as my motto, and in the majority of cases where other specialists would pronounce an operation necessary I am able to effect a complete cure by medication alone.

Let me tell you why my Dissolvent Treatment makes these remarkable cures.

How I cure eye diseases

First of all you must know a little about the eye.

Just look at the cut on page 8.

It is an illustration of a section of the eye-ball—showing the entrance of the optic nerve and the circulation of the blood in the eye.

Just see how closely the arteries and veins surround the

entire eye—see how completely they are networked through the tissue of the eye.

These arteries and veins are the life, vitality and health of the eye.

Imperfect circulation

Just as a city water system carries water to the houses and the sewage system removes the filth, so do the arteries bring nourishment and energy to the tissues, nerves and animal cells of the eye and the veins carry off the waste tissue. impurities and deposits in every part of the eye.

And just as it will cause diseases in a city to impede either the water or the sewage system, since it allows filth to collect, so will it make the eye diseased if anything prevents the arteries or veins from performing their proper functions.

Every disease that affects the eye is caused by imperfect circulation, the result either of strain or injury.

No matter what it is—with exception of acute diseases—(germ produced diseases) every disease that affects the eye is caused either by lack of nourishment due to improper circulation of the arteries or the formation of impurities and deposits due to the poor removal service of the veins.

I cure diseases of the eye by restoring the perfect circulation of the veins and arteries with my Dissolvent Treatment.

Dangerous eye waters

You can't cure diseases of the eye by applying eye waters, charged to the danger point with such injurious drugs as cocaine, nitrate of silver, bluestone.

Then you can't cure eye diseases with the knife.

For the knife is destructive and cannot reach the cause of Eye Diseases without injury to the eye itself—without causing blindness—sometimes death.

My Dissolvent Treatment stimulates the circulation, restores the nourishment of the tissues and nerves, and dissolves out the impurities and deposits that have collected because of the defective waste removal services of the affected veins.

When caustics and surgical operations have been tried

in vain and eye diseases have been pronounced incurable, my Treatment should be given a trial.

I have cured blindness of many years standing and in all my professional experience I have not injured the sight of a single eye.

I have cured all of the following named eye diseases and no doubt can cure you.

Cataract	Paresis of the Optic Nerve	Congestion
Hemorrhage of the Retina	Ambylopia	Asthenopia
Weak Eyes	Glaucoma	Amaurosia
Floating Bodies	Iritis	Stenosis
Eye Strain	Conjunctivitis	Opacities of the Cornea
Pterygium—Web Eye	Granulated Lids	Pannus—Scum
	Ulcers	Ophthalmia

Symptoms of disease

If your eyes feel weak, if they water easily, if they feel sore at times, if they ache, if they burn, smart or sting, if you see black specks or long "hairs or strings" floating in air, if light at night appears to have a halo around it, if objects appear dim and indistinct, if you have pain in the forehead or back of your head, if you feel nauseated or feverish—if you have any of these symptoms you should act at once.

For these are signs of some of the above eye diseases.

These indicate the necessity of the prompt application of my Dissolvent Treatment if you would save your sight.

How I Cure You with My Dissolvent Treatment

I give each case careful attention and then advise my Dissolvent Treatment for that special case.

Safe home treatment

Then, because my Treatment is absolutely safe, absolutely harmless, my patients apply it themselves at their own homes, under my written instructions, until a cure is made.

I do not lose sight of a single case; it is given close consideration from the time I receive the first letter until the complete cure is made.

Fig. 1 (From Nature)

Showing the six muscles attached to the eye, and the seventh attached to the upper lid. The muscles of the two eyes must work in harmony in order that the same object can be seen with both eyes.

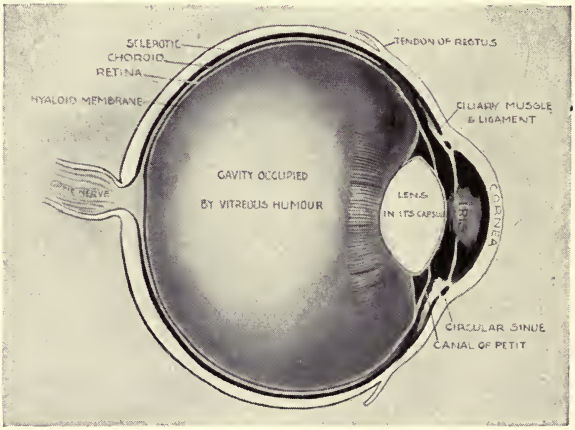

Fig. 2 (From Nature)

Sectional view of the eye. From the outer surface the consecutive parts shown are the cornea; anterior chamber containing the aqueous humor; iris and pupil; anterior capsule; crystalline lens; posterior capsule; posterior chamber containing the vitreous humor; the three coats forming the eyeball — retina, choroide and sclerotic; also the entrance of the optic nerve.

Good Eyesight

Is at a Premium in Every Phase and Situation of Life

WHO can estimate the value of good eyes? If one were to be offered the wealth of the world in exchange for his powers of vision the proposition would be rejected.

Of all the organs of special sense possessed by man the eye is by far the most important. Life certainly loses much, if not all, of its charm when the sight is lost. Yet in every walk of life the eyes are ill-treated and abused perhaps more than any other organ of the body. This common abuse of the eyes has caused spectacles (eye crutches) to be used almost universally.

Do not allow yourself to go blind

The majority of cases of blindness are caused by abuse and neglect, and by tampering with "eye waters," bluestone, nitrate of silver, cocaine and other caustics and poisons.

Weak eyes, like weak arms, can be developed and strengthened, and the eyes may be very much abused and maltreated, causing untold suffering for years, and then, by proper treatment, be restored to a very great degree of usefulness.

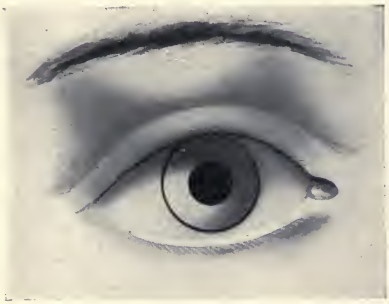

Fig. 3

Investigate my Dissolvent Treatment and learn what it has done and is doing for others. It will do as much for you. By its use many disease of the eyes and lids, formerly considered incurable, are successfully treated without the knife or danger.

Always bear in mind that the **knife should be the last resort in all diseases of the eye.**

Cataract

True cataract is inside of the eye and not on the outside, as many persons suppose. It is not a growth in or on the eye, but is defined as a "partial or complete opacity of the crystaline lens," which means a turning white of the lens of the eye.

What is a cataract?

The normal crystalline lens is as clear as water. Cataract is usually formed slowly; it may, however. come quickly—in a week, or even in a few hours. It may appear in one eye or both. If in only one eye the other eye is always affected sooner or later.

Fig. 3 shows a normal eye with the black pupil of about normal size. Fig. 4 shows an eye with the pupil artificially enlarged and cataract almost ripe or mature.

Symptoms of cataract

In the first stages of cataract the lens takes on a smoky appearance, and as a rule the sight is but little interfered with. Gradually the lens becomes more smoky and the patient complains of his glasses; of seeing things as through a haze or fog.

I have arranged a series of questions which enable one to ascertain by actual test whether the sight is perfect or not, and to detect the coming of cataracts in the first, or incipient stage.

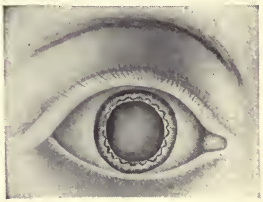

Fig. 4

I give below these tests and suggest that the reader apply them and find out the actual condition of the sight. The list should be preserved, as it can be absolutely depended upon as being based upon scientific principles.

Apply the tests very carefully and report the result to

me fully at your earliest convenience. I will advise you personally or by letter free of charge.

Tests for Cataract

Do you see objects as through a haze?

Does the atmosphere seem smoky or foggy?

Do spots or specks dance before the eyes?

Do you see more clearly some days than others?

Do you see better sideways than straight forward?

Do you see better in the evening or early morning than at midday?

Does a candle or street lamp seem expanded into a large flame?

Does a lamp or electric light seem to have a halo or circle about it?

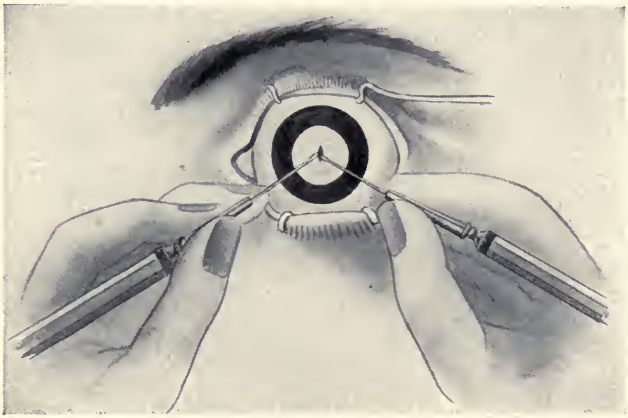

Fig. 5

Not My Method

Do luminous objects like the moon seem double or multiplied?

If you can answer "yes" to any one or all of these ques-

tions you have cataract in the incipient stage, and the Dissolvent Treatment should always be given a thorough trial at this time, otherwise the stage of hardening will set in and the cataract will become mature or ripe, shutting out all sight and leaving you in total blindness.

The cause of cataracts

The causes of cataracts have not been studied in proportion to the importance of the disease. For ages persons afflicted with cataract in the first stages have been told by specialists that nothing could be done until the cataract matured or ripened—this meant months or perhaps years of **waiting to go blind**—then an operation might, or might not, afford relief. The patient would then be dismissed from the doctor's presence and probably from his mind.

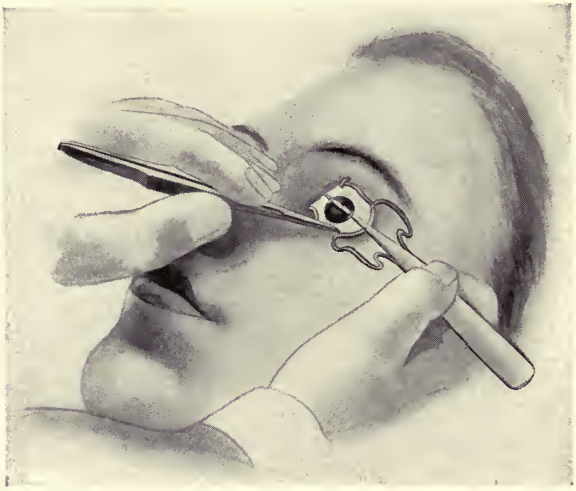

Fig. 6

Not My Method

What a mockery of the progress of the science and art of medicine! Oculists of great reputation have been known to admit that it never occurred to them that there was a

cause for cataracts, or that there was any other course to be pursued except the waiting and cutting method.

The best authorities said "wait and cut"—and they used the knife, often with the result of producing blindness for life. I have pursued the opposite course.

I sought for the cause, and studied methods for removing that cause, resulting in the perfecting of my Dissolvent Treatment, which stops the progress of the disease and assists nature to remove the deposit in the lens of the eye, restoring the sight and leaving the eye in a perfectly natural condition.

The Pin Hole Test

Test your eyes

An easy and simple test for incipient cataract is what is known as the "pin-hole" test. Take an ordinary visiting card or piece of pasteboard and make a pin-hole through the center of it; then place the card close to the eye, and look through the pin-hole towards the clear sky. If there is a smoky appearance or any lines or objects obstructing the vision, it shows the presence of, or the formation of cataracts, and my Dissolvent Treatment should be secured at once.

In the advanced stages, or mature cataract, of course this test is useless, as vision is gone, or nearly so, and the cataract shows plainly in the pupil.

It has long been the prevailing opinion among medical men, and through them communicated to the laity, that there is but one positive procedure for removing a cataract, and that the knife.

Is cataract curable?

Most oculists and physicians tell their patients they must wait until they go blind, or, in other words, until the cataract is ripe, before anything can be done. Many oculists and physicians scout the idea that a cataract can be cured by medicine.

Yet here, as in many other branches of surgery and medicine, rapid advances have been made—so much so, in

fact, that the knife in cataract is now relegated to the same class as the once popular calomel, purgatives and blood-letting.

Removal of cataract by the knife is not a cure

These so-called specialists do not know that cataracts can be dissolved because they have not tried it. They do not keep step with progress, and have no precedent on which to base their faith.

Precedent, by the way, is one of the greatest stumbling blocks to success. Because a thing has not been it is regarded by the precedent-loving people as impossible.

There are no limits defining the boundaries of the curable; the impossible of yesterday is the possible of today; everything is impossible until it is tried.

However successful the knife operation may be, the eye is left minus its crystalline lens, its power of accommodation is totally lost, and it is always in danger of secondary affections.

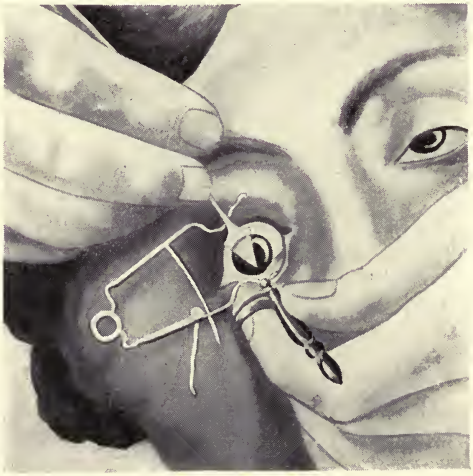

Fig. 7

Not My Method

The operation itself is one of the most delicate and difficult in surgery. Statistics show plainly, by unsuccessful operations of every-day practice, and cases of death occurring sometimes (under chloroform or cocaine) that the operation is not only cruel, but dangerous and unreliable.

Discovery of the Oneal Dissolvent Treatment

The absorption of cataracts has been experimented with, with more or less success, since Donders, the noted French oculist, first wrote about the subject in 1873.

I was not satisfied with the old absorption treatment which only helped a few. After many years' practice and study I finally succeeded in perfecting my Dissolvent Treatment more than twenty years ago, with which I have been so successful in restoring sight to the blind, not only in cases of cataracts but in other eye troubles.

Results permanent

When the treatment has been given a thorough trial the results have been nothing short of the marvelous, the vision not only being restored, but sight materially strengthened; and, moreover, the results are permanent.

There Is No Risk

Of course the results are more brilliant and easier attained in incipient or immature cataracts, so that no time should be lost when the vision begins to fail from this or any other cause. When the cataract is ripe, or nearly so, it takes longer to bring about a cure.

Do not wait to go blind

When eyes that are overtaxed or strained from any cause become weak, they should have immediate attention and scientific treatment.

In my Dissolvent Treatment there is no risk and the eye is left in a perfectly normal or natural condition.

A cataract cannot be operated upon until it is ripe. This may take years of waiting to go blind, or the cataract may only partially ripen, leaving the patient in a half-blind condition the rest of his or her life. Then why not try my Dissolvent Treatment and not wait to go blind?

Cures Other Eye Diseases

Other affections of the eye besides cataract are cured by my Dissolvent Treatment—such as **Glaucoma, Iritis, Paresis and Congestion of the Optic Nerve, Retinal Hemorrhage, Amblyopia and Amaurosis, Granulated Lids, Closing of Tear Duct (Stenosis), Paralysis, White Spots and Scars on the Eye, Retinitis, Choroditis, Drooping Lids, Asthenopia, Eye-Strain, Tumors, Cysts, Styes, and all abnormal conditions.**

The treatment in fact restores the natural circulation to the eye and surrounding parts, and when the natural circulation is restored all abnormal conditions disappear.

I prepare the medicine to suit the case. This is necessary, as some require stronger treatment than others.

Never injured an eye

I examine each case carefully, and so skillfully combine the local and constitutional treatment to meet the requirements of each patient's case that a failure is next to impossible.

I am justly proud of the fact that in all my extensive experience I have never injured an eye.

My Books

I have written and published the following books about the eye, any one of which will be sent free upon request: "Cataracts," "Optic Nerve Troubles," "Eye Witnesses," "Cross Eyes," "Eye Strain and Ten Questions Answered," "Ten Reasons," "General Eye Diseases," "Granulated Eyelids and Pannus," "How to Have Beautiful Eyes," "The Cause of Eye Diseases" and "About Wearing Glasses."

These books all contain valuable information about the eye and testimonials from cured cases all over the world. They are a valuable aid to the afflicted.

Fig. 5 represents the needling operation for soft cataracts, and Figs. 6 and 7 represent the first steps in the use of the knife.

Neither one of these methods is ever used by me.

It is well to remember that the **removal of a cataract by the knife is not a cure**—that is, the sight is never perfectly restored, and it is always done with the risk of losing the eye from inflammation. It is true that the use of the knife becomes necessary in some very old and hard forms of cataract (but always as a last resort), and for that reason my Dissolvent Treatment should be tried early in the disease, in which case it is invariably successful.

Free advice

The importance of losing no time in the treatment of the eyes cannot be emphasized too strongly, for if neglected too long the knife and its risk may be your sad experience.

My treatment has no knife and no risk.

If your sight is in any way affected write to me at once, and I will take pleasure in advising you free of charge.

You Can Be Cured at Home

It is sometimes advisable for the patient to come to the office for examination in order to ascertain the exact condition of the eye and to detect complications which may exist. It is, however, seldom necessary to remain in the city or to take office treatments.

Fill out my CONSULTATION BLANK, answering the questions the best you can and await my advice.

Treatment absolutely harmless

This will enable me to make a correct diagnosis and if I decide that you can be cured at home I can prepare the proper treatment, which will be sent prepaid with full directions for using if you decide to take it.

The treatment is absolutely harmless and does not interfere with the patient's usual occupation.

I am a firm believer in the home treatment, and advise it in preference to office or sanitarium treatment in the great majority of cases.

Do not allow any one to persuade you that there is any

risk in taking my treatment in this way, as I am now and have been for many years treating and curing patients in all parts of the world. Always write and wait for my advice.

Cross Eyes

Those who have cross eyes, or who are especially interested in the subject, should write for my booklet on "Cross Eyes," which describes the different forms and causes and gives testimonials of cases cured.

Fig. 8

There are four different forms of cross eyes, of which Fig. 8 illustrates the most common, all of which can be easily cured by my method, which is painless and bloodless.

Diseased Eyes

There are many diseases of the eye, some of which are easily cured by attention to diet and the use of simple home remedies.

No eye disease should be neglected

No eye disease, however, should be neglected, no matter how simple its nature may appear.

A slight inflammation of the eyes may be caused by a cold, by exposure to a strong wind, or by straining the eyes in various ways.

Such troubles can usually be relieved if taken in time by giving the eyes frequent baths in moderately cold water, to which may be added a little salt or boracic acid. The eye should be rested of course, and protected from strong bright light.

Granulated Eyelids

Trachoma

Fig. 9. This is one of the most common eye diseases in this country. It is a condition in which the mucous mem-

branes of the lids become thick and rough in consequence of little granular lumps. It is contagious and great care should be taken to prevent its spreading through families and schools.

The old methods — blue stone and other caustics — almost always fail to cure this trouble, and have been responsible for millions of ruined eyes.

Fig. 9

My treatment for granulation is mild and soothing. improving the eye from the first application.

No caustics, no confinement in dark rooms, nor staying in the city for months at great expense.

I allow my patients to treat themselves at home while attending to their usual work or business.

Diet.—Great care should be exercised by the patient regarding diet and constitutional treatment. Tea, coffee, and stimulants generally (including tobacco) should be discarded or used very moderately. Also avoid use of fat meats and pastry.

Send for my book on Granulated Eyelids which contains additional information, advice and testimonials of cured cases.

Web eye

Fig. 10 represents what is known as a pterygium growing from the inner corner of the eye.

It may grow from either corner of the eye or both. When first discovered it is only a slight thickening of the mucous membrane, but if not checked in time it will cover the sight and produce blindness. The growth can be checked and cured by mild treatment if taken in time.

My method of curing these growths is invariably successful.

Figs. 11 and 13 represent two cases of staphyloma, or bulg-

Stapholoma or bulging eyes

ing eye. This is a great deformity which usually affects one eye from disease and destroys the other eye through sympathy

My Dissolvent Treatment should be used early in this disease, and the result will be far ahead of that attained by any other treatment.

These conditions usually result from eye strain or from a prolonged continuation of similar conditions to those that produce congestion. Constitutional and local treatment are advised, with rest for the eyes. If the lids are swollen and the eyes red and hot an eye bath in salted water may be used to advantage several times a day.

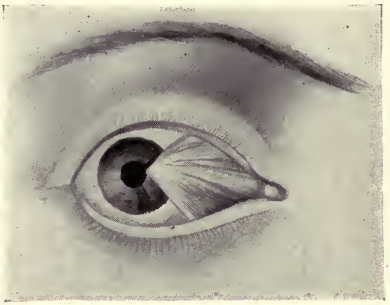

Fig. 10

The only safe and sure thing to do in any eye trouble where simple home remedies do not relieve quickly is to write a full history of your case as you understand it and await my advice, which will be given free of charge.

Weak eyes Watery eyes

Fig. 12. This and other diseases of the cornea, such as **ulcers** and **opacities, white spots, films, scums or scars,** are usually the result of granulated lids and inflammation, which have been improperly treated. The sight in all of these troubles is, of course, more or less impaired.

My treatment dissolves these unnatural growths and deposits easily and gradually, and by restoring the natural circulation causes the building up of healthy tissue.

Diet.—Rich foods, condiments, liquors and tobacco should be discarded. Great attention should be paid to the digestion, especially avoiding those things which disturb the stomach. See chapter on **Constitutional Treatment.**

A black spot before the eyes, whether it remains sta-

tionary or floats about, always indicates something seriously the matter with the eye, either in the form of beginning cataract or optic nerve trouble.

Black spots, specks, etc.

Any of these cases if taken in time can be easily cured and perhaps save you a lifetime of misery.

Write a full description as to how these spots or specks appear to you, and I will advise you what the trouble is and just what course you should pursue in order to obtain relief.

Fig. 11

Fig. 12

Diet.—Everything possible should be done to purify the blood. Drink water freely and avoid rich foods, alcohol and tobacco.

Eye-strain as a Cause of Headaches and Other Nervous Affections

Eye-strain is an enormously frequent, fertile, and unsuspected source of nervous diseases and other phenomena apparently non-ocular. While eye-strain may, and often does produce symptoms directly referable to the eye, such as pain in and around the eye, irritation and inflammation of the lids, etc., it is indeed a noteworthy fact that in many cases the patient complains little or not at all of ocular symptoms. In cases of the greatest eye-strain the patient will heartily aver that the eyes themselves are perfect and give no trouble.

Unsuspected eye strain

Thousands all about us today are suffering multiform and irremediable injury, directly or indirectly, because of unsuspected eye-strain.

Eye-strain as a cause of headache is a very important subject. Years ago I called the attention of the medical profession to the fact that eye-strain is a frequent cause of headache. At the present time investigation of a case of headache is not complete until the eye has been carefully considered. I firmly believe that at least three-fourths of all headaches are due to eye-strain. As to sick headache, it is probably due to eye-strain in ninety-five per cent of the cases.

Causes headache

The significance of headache is not often fully recognized because its death-bringing power is so slowly operative. Cases are not by any means rare in which after many years or a life-time of suffering caused by eye-strain, the mental moorings showed positive evidence of giving way, and melancholy, loss of memory, illogical acts, etc., became painfully apparent.

Eye-strain not only produces headache and neuralgia, but often causes vertigo, nausea, inability to apply the mind, mental depression and irritability of temper, loss of appetite, night terrors, insomnia or unrestful sleep, especially in children forced by ambition, parental pride, or an outrageous school system.

Fig. 13

It is also a well known fact that stomach troubles, indigestion, dyspepsia, nausea, etc., may be directly produced by eye-strain. Car sickness is almost universally caused by eye-strain, and cured by its relief. There is no doubt that many cases of anæmia, induced by loss of appetite due to eye-strain, have drifted

Indigestion

into hysteria and chronic invalidism, when, if taken early, proper treatment of the eyes would have brought and preserved health.

Fig. 14

A case of ulceration of the cornea, with inflammation, and blood vessels running toward the ulcer.

I cure my patients without the use of glasses. My Dissolvent Treatment builds up and strengthens the nerves and muscles of the eye to such an extent that all eye-strain is completely removed. In some extremely bad cases it is sometimes necessary to combine the use of glasses with the treatment, but great care should be exercised in their selection.

Improper Glasses

Hundreds are wearing glasses who do not need them at all, but simply need a special course of treatment for weakness of the nerves and muscles of the eyes, such as my treatment gives. In many other cases this treatment will enable persons wearing strong lenses to use glasses only one-half as strong and get along much better.

Try the test type

Try the test type (on page 29) and write to me, stating which letters you read best at fourteen inches. Give an accurate history of your trouble from the start, and I will gladly advise you what course to pursue. You cannot be too careful about this matter.

Warning

I have no partners or agents, and the public is warned against imposters traveling through the country representing themselves as such. My Dissolvent Treatment is my own discovery and is not known to or used by any one else. It is entirely different from any of the so-called Absorption Treatments used by others.

Constitutional Treatment

In all diseases of the eye the patient can materially assist the treatment by observing certain rules and regulations regarding diet, exercise, etc.; in fact, attention to these seemingly unimportant things will very often be all that is necessary to cure these troubles in the first stages. If the blood is purified the entire system is strengthened, and the eyes are naturally benefited. The subject of baths, diet and exercise for building up the general health is a very extensive one. Only a few of the most important facts in reference thereto can be mentioned here.

Baths

Regarding baths, it is only necessary to say that cold baths on rising in the morning are highly beneficial in most cases. The cold bath should be immediately followed by vigorous rubbing with a coarse towel until perfectly dry and warm. Hot baths should if possible be taken at least two or three times a week, immediately before retiring. Do not remain in the hot water over five or ten minutes.

It is remarkable how little is known regarding diet and its connection with eye diseases. From the stomach and intestines the whole body draws its nourishment, and if the food supplied is not of a character easily converted into life and strength-giving elements, the eye, as well as the entire organism, suffers and falls an easy prey to disease. There is nothing which outrages the stomach more than over-eating or eating when not hungry.

Diet

In most cases of eye trouble it is well to adopt a very abstemious diet for awhile. Two meals a day are often better than three and everything eaten should be thoroughly masticated. It may be well to add that meats, pastry or rich food of any kind should not be too heartily indulged in, and rye, graham or whole wheat bread should be given the preference over the white bread commonly used.

It is easy to keep well; in fact, it requires more energy to

be sick than to be well. Exercise of some kind is, of course, very necessary to good health, and out-door exercise is without question the best. Do not fear cold air while exercising. If you cannot exercise out of doors throw the windows wide open to the air and light. Daily walks in the open air are very beneficial, and perhaps the very best form of out-door exercise. One should walk as if there were an object in view. If you have no object try to make one.

Exercise

Persistence in all these things is, of course, necessary in order to obtain good results. Always remember that in the absence of good health and pure blood it cannot reasonably be expected that either the eyes or any other organs of the body will adequately meet the requirements imposed upon them by the strenuous life of today.

When the eyes have become diseased or seriously affected in any way it is necessary to order special diet, baths and exercise to suit the case. I will take pleasure in doing this for any one who is interested enough to write me for advice, which is free.

When to consult an oculist

When your eyes tire, and when you cannot continue for any length of time to regard small objects, as in reading.

When you involuntarily frown or partly close the eyes when looking at an object.

When things "swim" or become dim after being looked at for some time.

When the eyes ache, smart or water; when your eyelids get inflamed often, or when you have pain in the eyeball, temples, forehead or back of head.

When you have any nervous derangement that you cannot otherwise account for.

I will write you a personal letter informing you thoroughly as to the condition of your eyes and advising you how to care for them properly. I will tell you just what to do, how to exercise, bathe and diet, and prescribe proper treatment if necessary.

Some physicians have claimed that it is impossible for me to properly prescribe without making a personal examination. In proof that my home treatment is safe and successful I submit testimonials from reliable persons in all parts of the world.

To the Public

About testimonials

I challenge any person to prove that any testimonial I publish is not genuine. Those who testify to my ability to cure **Cataracts, Films and Scums, Cross Eyes, etc., Without the Use of the Knife,** are people of reliability and well known in their respective localities.

Many of my patients feel a delicacy about publishing anything concerning their cases, and under no circumstances will I use a patient's name without his or her consent.

Important Advice About Care of the Eyes

Going to bed early is said to make the eyes darker in hue and the wearing of gowns the color of the eyes is known to intensify their color and brightness. For an eye bath nothing is better than boracic acid. In a saucer of warm water put a teaspoonful of boracic acid and after letting it stand a few minutes bathe the eyes with it.

An eye tonic

Another excellent tonic is made of one ounce of distilled water and one grain of alum. Bottle this and apply it with a dropper, which can be bought for 5 or 10 cents at any drug store. Tilt the head back, open the eye wide, holding the dropper an inch or so above the exposed eyeball, and squeeze a drop into it. A drop of the wash in each eye is a good preparation for the theater or the ball when you are likely to be late about retiring and lights will be trying. It will freshen the eyes, cause redness to subside and give them a brighter and more open appearance.

Another excellent way to freshen tired eyes when you

must subject them to a strain, keeping them closed, of course —water smarts if it enters the eye: hold your head over the bowl, take up handful after handful of the water and hold it against the eye. Or lie down with a basin of the cold water beside you and cover the eyes with a cloth frequently dipped into it.

Tired eyes

The eyecup is used for washes which are to be applied liberally to lids and balls, as, for instance, the borax and camphor wash. This is composed of two ounces camphor water and two grains borax. It has a tendency to dry and is especially recommended for those troubled by "teariness."

If the cold causes intense smarting and redness, bathe the eyes with this wash, applied with the eyecup: One and a half ounces distilled water, one and a half ounces distilled witch hazel. Apply just before going into the cold and immediately upon coming into the warm house.

In making suggestions for the cure of existing evils, much good can be accomplished by calling attention to the importance of unimpaired sight. Children should be taught that pleasure as well as prosperity depends very largely on good eyes. They should be encouraged to use their eyes in ways that will benefit them. Games and sports that call for accurate vision should be rendered popular. Many athletic sports have produced a wonderful effect in a few years in making people strong and vigorous.

School children

Life in the open air, especially in the country, is favorable to the development of acuteness of vision. Lesson books for children should be printed in large, clear type. The letters given them to copy while learning to write should be large and plain. Young persons should be encouraged to look at distant objects and be prohibited from reading in poorly-lighted rooms. They should be taught how to use and not abuse their eyes.

In cases where the vision is becoming impaired an oculist should be consulted before permanent injury has been effected.

I can do no better in conclusion than to give some rules which my experience has shown to be good for preserving the vision:

Some rules

1. Avoid sudden changes from dark to light.

2. Avoid the use of stimulants and drugs which affect the nervous system.

3. Avoid reading when lying down or when mentally or physically exhausted.

4. When the eyes feel tired rest them by looking at distant objects.

5. Old persons should avoid reading much by artificial light, be guarded as to diet, and avoid sitting up late at night.

6. Do not give up in despair when informed that a cataract is developing. Remember it is not necessary to submit to a dangerous operation, and that there is no excuse in the great majority of cases for the wearing of glasses.

An Editor Investigates

What an editor says

We are frequently asked by our readers as to the professional standing and reliability of Dr. Oren Oneal, the oculist, of 52 Dearborn street, Chicago, whose advertising has appeared regularly in this publication for several years. The doctor is an expert in the cure of blindness, cataracts, films, scums, white spots on the eyes and all other eye diseases and defects. The testimonials which he publishes from time to time are genuine, and so far as our investigations have gone they furnish abundant evidence that Dr.Oneal actually performs the cures to which he lays claim. Were we not of this opinion we would not, in justice to our readers, carry the doctor's advertising in our columns. We are personally acquainted with the doctor, and know him to be a reputable gentleman and a very successful oculist.—*Orange Judd Farmer, Chicago.*

Special Type for Testing the Sight

1. If you can read this small print readily with either eye alone at a distance of fourteen inches you do not need glasses.

2. If you cannot read this line distinctly your eyes need attention

3. You may need glasses and you may need treatment

4. The Oneal Dissolvent Treatment is mild

5. Do not allow yourself to go blind

6. THE TREATMENT IS NOT EXPENSIVE

7. DON'T WAIT TO BE BLIND

8. THERE IS NO RISK

Extracts from Testimonial Letters

THE evidence of many people who have been sufferers with eye diseases and who have found a permanent cure in my treatment will be of interest to those similarly afflicted. The following extracts are from people who have voluntarily written, and I court a personal investigation from any one seeking relief. I request that you enclose four cents in stamps when writing to any of the names below for reply. If you can possibly spare the time I would suggest that you write to at least ten. The expense will not be great as compared with the satisfaction of hearing from the cured patients direct. Do not condemn the treatment if you fail to receive replies from all your letters, as mail frequently miscarries, and letters are sometimes not answered promptly from want of time, sickness, etc.

Write to several

Baby's Eyes Cured in One Month

PLEASANT HILL, MO., June 17, 1905.

Dr. Oren Oneal:—My baby boy's right eye was weak from birth. I tried different treatments, but to no purpose.

Weak from birth

I wrote you describing his case. You promptly answered me, saying my baby had congested eyes and giving terms for treatment. I sent for one month's treatment and from the very first it began to improve. At the end of the month his eye was as clear and bright as though nothing had ever been wrong with it.

MRS. AUGUST LARSON.

Suffered Twenty-five Years

BELLEFONTAINE, OHIO, Aug. 10, 1905.

Dr. Oren Oneal:—I have suffered with optic nerve trouble for twenty-five years. After using your painless and simple treatment for four months, I am thankful to say there is no pain in or around my eyes. My sight is clear and good. I think the cure complete and further treatment unnecessary.

J. Q. EASTON.

Cataract Fully Cured

AUSTIN, ILL., November 20.

Dr. Oren Oneal:—I had been troubled for some time with failing sight, until I lost the use of my eyes altogether, except for walking about the house.

I consulted oculists, who told me that I had a Cataract, and that there was nothing to be done, except to use the dreaded knife. After taking your treatment, I can truthfully say that my sight is fully restored. I am very grateful to you, and shall use my influence to have others use your treatment. MRS. E. F. HUNT,
612 N. Waller Ave.

Glaucoma—Sight Entirely Restored in Three Months

NEW PLATZ, N. Y., July 26.

Dr. Oren Oneal, of Chicago, for the past three months has, with great success, treated my left eye for glaucoma. Treatment entirely by correspondence, the doctor sending his medicines from Chicago. The sight of my left eye was nearly gone and is now entirely restored by Dr. Oneal's treatment.

A dreaded disease

I lost my right eye from glaucoma some three years ago, though I successively was under the treatment of noted New York oculists.

P. O. Box 183. WASHINGTON IRVING.

Optic Nerve Trouble, Floating Spots and Headache Cured

WORCESTER, MASS., July 18, 1905.

Dr. Oren Oneal:—I had Optic Nerve trouble, the result of eye strain, shooting pains through the eye balls, and almost constant headache, great black spots floating before my eyes, and very sensitive to light. I was afraid I would lose my sight entirely.

I saw your advertisement and wrote you. You said you could cure me. Since I began your treatment the pain has all gone from my eyes, the black spots have disappeared, light does not affect them as it did, and the relief from all this seems marvelous. I can recommend your treatment to any one who has any eye trouble.
MRS. M. L. DENNIE, 12 West St.

Paralysis of Optic Nerve and Scum

RICHMOND, IND., Sept. 9, 1905.

Dr. Oren Oneal:—I want to thank you for the great relief your treatment has given me for Paralysis of the Optic Nerve and Scum. Having been a sufferer for nine years, doctering all that time, and receiving no relief.

Suffered nine years

I commenced your Home Treatment, and within four months I was going without glasses. I can see to read any print, and sew with ease. The headaches have also disappeared.
MISS CATHERINE THESING, 216 N. 16th St.

Cataracts Cured Three Years Ago

BUFFALO, N. Y., Oct. 1, 1905.

Dr Oren Oneal:—My mother's eyes remain as good as when you dismissed her cured over three years ago. I had her eyes tested a short time ago and the oculist pronounced her vision normal. For the benefit of those who may see this statement I will say that my mother, Mrs. A. P. Rifle, had nearly lost her sight from cataracts, and had been informed that an operation would be necessary. I had no faith in advertised cures, but finally decided as a last chance to try your treatment. My mother was practically cured in three months' treatment. The cure has been a Godsend to her, for the reason that her general health has been so poor for the last few years, being unable to sit up most of the time. But since her eyes have been cured she spends the greater part of her time in reading, and without regard to size of print.

Had no faith

117 Morgan Street. MRS. M. H. SOUTHWICK.

Suffered for Twenty Years

MARQUETTE, MICH., June 15, 1904.

Dr. Oren Oneal:—At the early age of ten years I had a very severe attack of the measles which left my eyes in a weak condition. For the last twenty years I have suffered with inflammation of the eyes, granulated eyelids and congested optic nerve. Do what I could my eyes grew worse. I was unable to attend to my home duties. I wrote to you explaining my case and in a short time ordered your treatment. Soon I noticed a great improvement and gradually the granulations were completely dissolved. I can read and do any kind of work without trouble.

Cor. Washington and Third Sts. MRS. V. E. PEARN.

Cataracts Cured in Two Months

SKIDMORE, MO., Aug. 4, 1905.

Dr. Oren Oneal:—I feel that it is my duty to tell you how thankful I am that your treatment has cured my eyes of cataracts in so short a time. In two months I was cured. That bad feeling in my head has left me and my health is improved. It is three months since they were cured and they are still good. I wish everyone could be saved from going blind as I was.

MRS. LUCY SEITZ.

3

Dr. White Had No Faith, But Was Cured in Three Months

PHELPS, N. Y., April 5, 1905.

To whom it may concern:—For several years I was afflicted with both double vision and drooping eyelids—ptosis and congested optic nerve—and during that time was under the care of several of the most skilled and noted oculists in this country, none of whom seemed to comprehend the nature of my trouble, consequently I received no relief whatever. During the summer of 1903, I gave up my practice (dentistry) entirely, and upon the advice of my family physician, passed the time in the open air, thinking the change from the office would bring relief. Upon the suggestion of a friend, I was induced to consult Dr. Oneal, which I did by correspondence, and he assured me he could give me absolute relief.

With my previous experience my faith was limited; I ordered a trial prescription. In three weeks' use the result to me was wonderful, yes, marvelous. When I had used the third prescription I felt like a new man and considered my affliction a thing of the past. During the treatment I devoted my entire time at the operating chair and worked with pleasure and comfort.

Ptosis cured

I believe that Dr. Oneal's method of treatment is founded on a basis thoroughly scientific and that his dissolvent remedies will perfect a cure where the ordinary methods employed will fail and to those afflicted with any abnormal condition of the eyes, whether of an acute or a chronic nature, I most heartily recommend and endorse Dr. Oren Oneal.

W. A. WHITE, D. D. S.

Cataracts of Long Standing

BLACKSTONE, MASS., April 3, 1905.

Dr. Oren Oneal:—Having had cataract on each eye for some time, I am glad to say that under your treatment for two months I can see a great improvement, suffering no pain and much better vision. I am 72 years old.

MRS. ABI WHEELOCK.

Blepharitis, Opacity and Optic Nerve Trouble

ADVANCE, N. C., April 5, 1905.

To the public:—I wish to state most sincerely that Dr. Oren Oneal has cured my eyes by his wise treatment, which I was not anxious to try, but at last did; and am more than pleased with the three month's treatment which I used for blepharitis, congestion of the optic nerve and opacity, caused by an attack of erysipelas.

MISS JULIA CHAFFIN.

Granulated Eyelids and Optic Nerve Trouble Cured in Less than Two Months

MANSFIELD, MO., Aug. 17, 1905

To the public:—In the spring of 1904, I noticed my eye sight was failing me very fast. I consulted a specialist, but received no help from him. I left him after paying him a good fee, and returned home. But my eyes continued to grow worse, and I decided to write to Dr. Oren Oneal of Chicago. He told me I was afflicted with granulated eyelids and that the optic nerve was affected, causing the nervousness and headache. He sent me one month's treatment, which I used as directed, and at the end of the month I knew my eyes were decidedly better. However, I did not think they were cured, so ordered another month's treatment. Before using all of the last treatment my eyes seemed to be as well as ever and I was a happy woman again. I have had no trouble with them since. I will answer any inquiries from any person who has any doubts or is afraid to trust his case in Dr. Oneal's hands. He will help you if any one can.

Well and happy

R. F. D. No. 2. MRS. PERRY CLARK.

Granulated Eyelids and Pannus

WARWICK, ORANGE COUNTY, N. Y., April 25, 1905.

Dr. Oren Oneal:—I want to add my testimonial in regard to my eyes; my trouble was granulated eyelids and pannus. I have used your home treatment and it has greatly helped me, so much so that I can recommend your treatment to any one suffering from the same cause or any eye trouble. Any one wishing to write me, I will cheerfully answer or go and see them myself if not too far.

R. H. VREELAND.

Suffered Years With Optic Nerve Trouble—Cured in Two Months

CORYDON, IND., June 30, 1905.

Dr. Oren Oneal:—I write to thank you for the relief I have received from your home treatment for my eyes and hope that others may be induced to place themselves under your treatment.

For a number of years I had suffered with congested optic nerve, and having tried other remedies and glasses without receiving any benefit, I placed myself under your home treatment, and after two months' careful following of the directions sent by mail, I have found permanent relief, and I can see better than I have for years. I submit this brief testimonial with gratitude for the benefit I have obtained for myself, and sincerely hope it may lead to the relief and cure of others.

P. O. Box 247. MRS. JANEY COX.

Cataracts Cured

SPRINGFIELD, OHIO, June 1, 1905.

Dr. Oren Oneal:—I can cheerfully recommend your method of curing cataracts. I can speak in the highest terms of your treatment. It has done wonders for me. I am very thankful that I found a way to cure it without the use of the knife. I will gladly recommend you to any one who may call upon me or write to me.

181 E. Grand Avenue. MRS. ANNA HOCKETT.

Cataracts and Congested Optic Nerve Cured

ST. PARIS, OHIO, Aug. 15, 1905.

Dr. Oren Oneal:—I thank you for interesting me in your dissolvent treatment. After using same for a short time, and by the help of God, my eyes are well and strong, having suffered with cataracts and congested optic nerve. All the pains in my head are gone and I can go to bed and sleep all night. You may publish this if you please to do so, also my photograph, which I am enclosing herewith.

All pains are gone

MRS. S. J. APPLE.

Granulated Eyelids, Conjunctivitis and Cataracts Cured After Ten Years' Suffering

PALO, CARROLL CO., ARK., Jan. 16, 1905.

Dr. Oren Oneal:—For ten years I have had granulated eyelids, catarrhal conjunctivitis and cataracts. From the day I began the use of your medicine I began gaining in my eyes, and to-day I feel like a new woman. I would be glad to recommend your Dissolvent Treatment to any one who will write me.

This is written by one who is interested in sufferers from eye diseases, and I will answer all letters of inquiry. MRS. MARY MARSHALL.

Almost Blind With Cataract—Can Now Read the Finest Print

HURON, S. D., April 13, 1905.

Dr. Oren Oneal:—I was almost blind with cataract when I began treatment with you. The oculists here told me that I must let the cataract get ripe, then have it taken off, and that I could not be cured by the dissolvent treatment. I was almost discouraged. My husband said to try your home treatment, and I did. Now I can see to sew and thread my needle and can read the fine print of the newspapers. MRS. E. T. LOSEY.

Had Optic Nerve Trouble Thirty Years, Cured in Two Months

HAMILTON, MO., Oct. 11.

Dr. Oren Oneal:—I was afflicted with congested optic nerve for thirty years, and believing that all advertisements were fakes and all testimonials were bought, I could not be convinced of the efficacy of the Dissolvent Method until I received your book. After studying that book through, I concluded to try treatment. Having used your medicines for two months, I pronounce my eyes cured. This is no "paid" testimonial, and I hereby give you the privilege of using same in any publication.

R. F. D. No. 1. GEO. W. MCFEE.

Cataract and Optic Nerve Trouble Cured

CRABTREE, ORE. (LINN CO.), Oct. 14, 1904.

Dr. Oren Oneal:—The 19th of December, 1903, as I was stepping out of doors, great sheets of lightning came before my eyes. I could not describe my feelings. It came before my eyes every few minutes for fifteen days, and then black streaks commenced coming.

Had doctored with others

I doctored with different ones for irritation of the optic nerve and cataract, but with no relief. Your treatment was brought before my notice and I resolved to try it.

In one month I was a little better, and in five months my eyes were entirely well. MRS. MARY A. RICHARDSON.

Throws Away Glasses

LONGMONT, COLO. July 21.

Dr. Oren Oneal:—Being troubled with irritation of the optic nerve and after having to wear glasses the most of the time for the past five or six years, I take great pleasure in telling my friends to whom I owe my debt of gratitude, as, after two months' treatment, I was enabled to go without them. Your treatment is so easy to use, and withal so harmless, that a child could apply it. MISS ADA M. RICE.

Granulated Lids and Pannus Cured

CROSS FORK, PA., Aug. 3.

Dr. Oren Oneal:—I take great pleasure in writing to you of my little girl who had almost lost her sight from granulated eyelids and pannus and could not see across the kitchen when I saw your advertisement. I sent to you for free advice, and after using your home treatment a short time, she sees as well as ever. I have been slow in writing since she has been cured, but thought I would wait and see if her eyes might get worse, but now I feel sure they are permanently cured. MRS. JAMES R. WELCH.

Congested Eyes and Paresis of the Optic Nerve Cured in Two Months

HILLSBORO, TEXAS, Oct. 15.

Dr. Oren Oneal:—I began your dissolvent eye treatment for congested eyes and paresis of the optic nerve on June 6th, and two months' home treatment found my sight so restored that further treatment was unnecessary. I did not experience the slightest inconvenience from the treatment. Your medicines are all that you advertise and more. I am 70 years old. J. B. SUMNER, Box 84.

Prominent Business Man of Boston Cured of Optic Nerve Trouble

BOSTON, MASS., Oct. 5.

Dr. Oren Oneal:—In this, my final report of progress during the course of treatment prescribed by you, I wish to renew my former expressions of gratitude for the able manner in which you have brought about for me a complete cure of a very bad case of eye strain and congested optic nerve.

Improved from the start

The improvement was noticeable from the start, and now, after a few months conscientious application of your remedies, I am able to continue my work, which at one time it seemed I should be obliged to abandon.

SAMUEL L. CARR,
Advertising Manager R. H. White Co.

Cured in Two Months

NAVASOTA, TEX., Jan. 16.

Dr. Oren Oneal:—I saw your ad in the Frank Leslie Magazine, and as I had been suffering so much with inflamed eyes, cataract and film, with great pain and soreness in the eyeball, concluded I would try your treatment, which I did for two months I am glad to say I feel no pain at all now and my eyes are strong. I feel very thankful for your kindness and treatment. Respectfully,

MRS. ANNIE R. FOSTER.

Cataracts of Long Standing

NORWALK, OHIO, March 13.

Dr. Oren Oneal:—A friend handed me one of your books on your treatment of the eye. I lost no time in placing my case in your hands, for I had already consulted two specialists about my eyes. They both pronounced it cataract of long standing, and that they would be ready to be operated on in about four months, but would not assure a successful operation. They warned me against any treatment to effect a cure except the knife, but I am happy to say after a few months of your treatment that I can read and transact all kinds of business

MISS J. M. RUMSEY.

These Old Eyes Are Straight

MT. PLEASANT, IOWA.

Dr. Oren Oneal:—This picture speaks for itself, showing, as it does, my old eyes, that were crossed for over fifty years, as straight and true as when I was born, and you don't know the relief I experience as I go out on the street and realize that people are not making remarks about my cross eyes. I cannot thank you enough for what you have done for me. You claimed so much that I thought there must be some fraud about it. But you did everything you claimed. CHAS. WILKINS.

Cured of Cataracts

MARENGO, ILL.

I wish it were possible to make all the people who are afflicted with eye diseases understand what glorious work Dr. Oren Oneal, the noted Chicago oculist, is doing. I had been blind, practically, for years, and was hopeless of ever seeing again. Dr. Oneal only treated me a few months for cataracts, which caused my blindness, and I am now cured, and can see to read a newspaper without glasses Dr. Oneal did not do a thing that could hurt me; no knife, danger or inconvenience. T. W. HENRY.

Was practically blind

Cataract Cured in Two Months

NORTHPORT, MICH., Aug. 8, 1904.

Dr. Oren Oneal:—I am glad to add my testimony to the many you already have, as to the benefit your Dissolvent Treatment for the eye has been to me. I have for many years been afflicted with cataract, a dark spot having formed over one of my eyes and so affecting the other that I was almost blind, but after two months of your home treatment the dark spot has disappeared. I can cheerfully recommend your method to all who are afflicted with eye trouble.

MRS. H. S. SPENCER.

Granulated Lids and Optic Nerve Paralysis

TENSTRIKE, MINN., Sept. 4.

Dr. Oren Oneal:—I cannot express in words how I appreciate your treatment after suffering twenty-two years with granulated eyelids and paralysis of the optic nerve — blind most of the time. The severe treatment that so many eye doctors gave me left my eyes in a bad condition. In fact, I had lost all hope of any help, until someone read to me one of your advertisements. I felt that God had pointed it out to me. Now I can see and feel happy and I owe it all to Dr. Oneal's Dissolvent Method.

MRS. EMMA I. CARTER.

Cataracts of Twenty Years Standing Cured

Mrs. S. C. Willard, of Libertyville, Ill., says: "Dr. Oneal cured me of cataracts in both eyes that had caused almost total blindness. The cataract in my right eye had been twenty years in forming, and the one in the left eye had been eight years. Several years ago I consulted a prominent specialist in Chicago, and after examining my eyes carefully, he said: 'Your right eye is practically dead so far as sight is concerned. The other eye is gradually going blind, but it will be probably two years before the cataract is ripe. At that time I can remove both cataracts by cutting them out with a knife.'

Knife had been advised

"At the time I came to Dr. Oneal the sight of my right eye was practically gone. I could only discern light with it. With my best eye I could scarcely recognize my best friends.

"Dr. Oneal's treatment entirely restored the sight of my left eye in three months, and in eight months enabled me to see perfectly with my right eye."

A Distinguished Traveler Writes

The accompanying is an excellent likeness of Mrs. A. D. Isherwood, a distinguished traveler and correspondent, which is from a photograph taken in Florence, Italy. She says:

Cured of cataracts

"For several years my sight had been gradually failing, due to the formation of cataracts on both eyes. I also had granulated lids and a partial atrophy of the optic nerve. For about a year my vision had been so bad I could not distinguish one friend from another a short distance from me. In fact, at times I could not see the face of any one near me, and at all times it was as though the dim outline of an opaque cloud appeared to cover all objects.

"I heard of Dr. Oren Oneal, of Chicago, and commenced treatment with him. Although it may seem almost incredible, the mist that was constantly before my eyes has rapidly disappeared and I feel assured that Dr. Oneal's method is the only one that can restore the sight.

"To the suffering I most cheerfully say, go to Dr. Oneal and be saved from that most dreaded affliction, blindness. He is sincere and will not try any experiments on your eyes. You will find him an honest, true gentleman."

Mrs. A. D. Isherwood, Blissfield, Mich.

Left Her Glasses Off After Two Months

CORWIN, KAN., Dec. 19, 1904.

Dr. Oren Oneal:—Our daughter Blanche had granulated eyelids for over a year. They were so bad that she could not read at all without glasses, and only a few minutes with them on.

We began home treatment Aug. 1. Sept. 12, she started to school and before we had finished the second month's treatment, she had discontinued the use of glasses and could study or read in the evenings, in fact, use her eyes at anything she chose, without the least pain or inconvenience.

MRS. E. L. JOHNSON.

Cataract

CENTRAL FALLS, N. C., Nov. 14, 1904.

Dr. Oren Oneal:—I will write you a few lines in regard to what your medicine has done for my eyes. It has done me a world of good and I cheerfully recommend it to any one suffering with cataracts. Your treatment is all and more than you claim for it. I enclose one of my photos and you are at liberty to use the same with this letter, and any one doubting this can write me, enclosing stamp, and I will reply.

A world of good

MRS. SARAH BONKEMEYER.

Granulated Lids and Pannus

JEFFERSON, S. C., Dec. 7, 1904.

Dr. Oren Oneal:—I wish to thank you for what you have done for my eyes. I suffered for years with granulated eyelids and pannus, and nothing seemed to do me any good.

After a short course of your home treatment I can truthfully say that my eyes are cured.

MRS. M. J. MCMILLAN.

Congested Optic Nerve and Muscular Weakness

GRASMERE, N. H., Dec. 17, 1904.

Dr. Oren Oneal:—I have been using your treatment for congestion of the optic nerve and muscular weakness. My eyes were very bad and I began to be afraid that I should lose my sight,

My eyes are well and I feel grateful to you and for your kindness.

MRS. F. D. MARTIN.

Granulated Eyelids and Stenosis of the Tear Duct

GROTON, MASS., Dec. 12, 1904.

Dr. Oren Oneal:—I am very glad that I took your home treatment for granulated eyelids and stoppage of the tear duct. After three months' treatment I find that my eyes are better than they have been for three years past and it is all due to your treatment, and I can truly recommend it to others.

R. F. D. No. 1. MRS. H. M. DOWNS.

Paralysis of the Optic Nerve and Hemorrhage of the Retina

ROCKWALL, TEX., Nov. 17, 1904.

Dr. Oren Oneal:—Last December our daughter Jeanette's eye became very seriously affected, and in a few weeks she could not see at all. The specialist who examined her said it was paralysis of the optic nerve and hemorrhage of the retina. He said treatment would be useless, as her case was incurable. We sent to you for treatment, and in two months her eye was well and she could see as well as ever.

R. F. D. No. 1. MR. AND MRS. H. K. MILES.

Inflamed Eyes and Congested Optic Nerve

LOUP CITY, NEB., Dec. 17, 1904.

Dr. Oren Oneal:—Your eye medicine is a wonderful cure for bad eyes and I wish I could tell all the people in the world about it. I suffered so much with pains from inflamed eyes and congested optic nerve and such awful spells with my head. I could not read, sew, or ride without going almost crazy. After taking your treatment two weeks I could see a big change, and when I finished your second month's treatment, my eyes were cured. That was in August, and they haven't bothered me since.

MRS. A. C. HUNT.

Had Cataracts on Both Eyes

COTTONWOOD, CAL., Dec. 16, 1904.

Dr. Oren Oneal:—Very fortunately for me a few months ago a friend sent me one of your books on eye diseases. I was suffering with cataracts on both eyes; I could not read or sew, and I expected to lose my sight entirely. I wrote to you and after taking treatment about three months, I am cured. I can read and sew with ease. I can truly say that your treatment is certainly wonderful. I wish that any one who has any disease of the eyes would take advantage of your skill. MRS. EMMA J. TOZER.

Cured in three months

Cataracts and Congestion—Cured at the Age of Eighty-three

BLOOMDALE, OHIO, Dec. 13, 1904.

Dr. Oren Oneal:—I feel very desirous of informing you how much you have done for my eyes with your dissolvent treatment.

Everything I would look at was double, and could not see to read, sew or write. Now I can see to do all of this with ease. For the last three years my eyes have been growing dark and painful with cataract and congestion, but now they are well, and I cannot express myself highly enough in your favor. I am now eighty-three years old and my eyes are stronger, can bear more light than when I was younger. They were always weak and tender and I owe this change all to your dissolvent treatment. MRS. L. D. SIMON.

Congested Optic Nerve Cured in Two Months

FT. COLLINS, COLO., Jan. 18. 1905.

A sufferer for nine years

Dr. Oren Oneal:—Having been a sufferer from congestion of the optic nerve for nine years, I determined to try your treatment. I continued treatment for a month and a half, and my eyes were so much improved that I thought I would not need any more, and discontinued its use for ten days. My eyes gave me some little trouble for a few days, so renewed my attention to the treatment, completing the full month, making, in all, two months' application of the remedies. My eyes have not troubled me at all since then.

310 Peterson St. MRS. ERNEST SMITH.

Suffered Nineteen Years

NEW CASTLE, NEB., Jan. 20, 1905.

Dr. Oren Oneal:—I am glad to tell you that my eyes are all right. They were sore for nineteen years, and I had almost given up hope of ever having them cured of optic nerve trouble and scars and ulcers. I thank the dear Lord and your dissolvent method for the cure, and can now see to read and write as well as any one. MRS. WILLIAM JORDAN.

Threads a Fine Needle at the Age of Seventy

TROUTVILLE, VA., R. F. D. 3, Jan. 12, 1905.

Dr. Oren Oneal:—Five years ago I suffered constantly with headaches and blindness, the result of congestion of the optic nerve and cataract. Last spring I decided to begin treatment with you, which I did in May, and my eyes began to improve at once. This continued until I now feel as well as ever and can see to thread a fine needle without difficulty, which is quite unusual for one of seventy years of age. MRS. PRESTON HIPES.

Granulated Eyelids Cured in Two Months

APPLE RIVER, ILL., Jan. 4, 1905.

Dr. Oren Oneal:—For two years I had granulated eyelids and consulted two "noted specialists." I took treatment from both without receiving any benefit. After using your home treatment for two months, my eyes are entirely well. For more than one year I was unable to read or write, as my eyes pained me steadily, but now I can do both, for which I am truly thankful, not only to you, but also to the dear Lord for his kindness to me.

MRS. JANE GROVES.

Atrophy of Optic Nerve and Cataract

GERMANTOWN, PA.

Dr. Oren Oneal:—Four years ago my sight began to fail me in both eyes. A mist came over them. I treated with several oculists for three years for atrophy of the optic nerve and none seemed to help me. One told me that the optic nerve was dead. I went to Willes' Eye Hospital, Philadelphia. They told me it was useless to spend any more money, for I had cataract on both eyes and I would have to wait until they became ripe. After the first few months of your home treatment, my vision commenced to improve, and, thank God, I can now say I am in a new world, use no glasses except for close reading and fine work.

In a new world

421 Mechanic Street. JOHN B. HURST.

Granulated Eyelids and Pannus

TAYLOR'S FALLS, MINN.

Dr. Oren Oneal:—It is a great pleasure to me to inform you that my eyes are cured of granulated eyelids and pannus, for which I am indebted to your dissolvent treatment. Before I used your treatment, I could not open my eyes upon awakening in the morning They were so sore that I could not see to read. In lamplight it was impossible to accomplish anything. After two weeks' use of your treatment I could read and my eyes felt fine, and now they are entirely cured. CHAS. NYGREN.

Cataract Cared in a Few Months

HUNTINGTON, IND.

I wish it were possible to make all people who are afflicted with eye discases understand the glorious work Dr. Oneal is doing for those who employ him. Dr. Oneal has been treating me only a few months for cataract of my left eye. Now I can see as well as ever. His treatment is so mild and harmless that any one can use it, I have cured myself by strictly following his directions in the application of the medicines. MRS. ELIZABETH CLICK, BOX 215.

Optic Nerve Trouble Relieved in Three Days

LYONS, NEB., June 12, 1905.

Dr. Oren Oneal:—I wish to add my testimonial with others in favor of your dissolvent treatment. I am encouraged to write to you, as you have now been treating me for four months for congested optic nerve and my eyes are well. I thank God that I heard of you. I have such confidence in your treatment for the eyes that I recommend it to the afflicted everywhere. I wish to add that my eyes were relieved in three days. MRS. SUSAN PIPER.

Cataracts Cured After Sight Was Nearly Gone

MT. PLEASANT, IOWA, June 26, 1905.

Dr. Oren Oneal:—I feel it is my duty to add my testimonial with many others who have been cured by your dissolvent treatment. My eyesight was nearly gone when you began treating my eyes for cataracts and weakness, and in less than seven months my eyes were healed. I have no headache, no pain in or about the eyes. They feel bright and everything looks different to me now. I can read well. My age is sixty-seven. Before I began treatment I could not read the largest print.

Could not read the largest print

MRS. SUSAN BLACK.

Conjunctivitis and Optic Nerve Trouble Cured

OSGOOD, IOWA, March 7, 1905.

Dr. Oren Oneal:—I most heartily recommend your painless method of treating the eyes at home. I had conjunctivitis and a severe attack of congestion of the optic nerve and your dissolvent treatment cured my eyes in two months.

MRS. H. F. GIDDINGS.

Glaucoma Cured in Three Months

MUSKINGUM, OHIO, Aug. 5.

Dr. Oren Oneal:—I feel so thankful to you for what you have done for me that I want to tell it to every one, especially those who have any eye trouble. Last November something got the matter with my left eye, that would come over it every evening and sometimes through the day. I went to an oculist; he told me I had glaucoma, and that I would have to have an operation. I went to another one and used his medicine four months, growing worse all the time. I used your treatment but a few times when the scum that had covered my eye was gone. After three months my eyes were well. MISS KATE MOSEY.

Cataract and Granulated Eyelids Cured in Three Months

LOVELAND, OHIO, Aug. 14, 1904.

Dr. Oren Oneal:—I wish to express my thanks to you for the good you have done my eyes in three months' time. My eyes were in a very bad condition when I heard of your advertisement in my magazine. There was a mist constantly before them, also black spots, and I had headaches continually, but now that is all removed by your Dissolvent Treatment. I had cataract and granulated eyelids in both eyes three months ago and now they are cured.

R. F. D. No. 2. MRS. THOMAS HOLLAND.

Cured of Cataract

BOSTON, MASS., Dec. 23.

Dr. Oren Oneal:—Last winter I caught a cold and it settled in my right eye, which became very painful. The result was a cataract, for it became very dim; in fact, was practically useless as far as seeing was concerned. After a little over two months' treatment, under your direction, the shadow disappeared and the eye, as far as I am able to discover, is perfectly normal.

F. H. NYE, 247 Columbus Ave., Suite 9.

Inflammation and Ulcers Cured

AUBURN, MICH., Oct. 14, 1904.

Dr. Oren Oneal:—Having suffered for several years with inflammation and ulcers of the eyes, which rendered them useless at times, I became almost discouraged, but hearing of Dr. Oren Oneal's advertisement in the "Orange Judd Farmer," I decided to try his treatment, which I found very mild and effectual. It was just as recommended, and, later, having an opportunity to visit his office, found him a very courteous gentleman. I would recommend his treatment to all suffering with like troubles.

R. F. D. No. 2. MRS. ADELAIDE RASICO.

Congested Optic Nerve and Granulated Eyelids

WORCESTER, MASS., Jan. 18.

Dr. Oren Oneal:—I desire to express in a few words my gratification for the improvement already attained by the use of your Dissolvent Treatment. I have used the treatment but three months.

By many years' constant use of the eyes in my vocation of bookkeeping, I had so strained the optic nerve that I was suffering much pain; also, there was some trouble with granulated eyelids. Both of these afflictions have been almost entirely eradicated, and the cure was obtained by your treatment without absence from business or social duties.

1 Agawam St. FRED KNIGHT.

Had Granulated Eyelids Eight Years

LUTHER, MICH., Oct. 10, 1905

Dr. Oren Oneal:—I want to thank God I ever found your ad. I had suffered so much from granulations for eight years, I had to give up reading and sewing and my housework was not half done. I had lost power to raise my eyelids, and a lump as large as a wheat kernel came in the inner corner of my left eye. After four months' treatment I am all right. I see to do my own work without glasses and people remark about the appearance of my eyes.

MRS. ISAAC WOLFE.

Granulated Eyelids Cured

HOPKINS, MINN., Sept. 25.

Dr. Oren Oneal:—This is to certify that I have been troubled for more than a year with granulated eyelids and congested eyes. My suffering was unbearable and no treatment seemed to do me any good until I commenced treatment under your direction, and before three months I was able to read or sew by artificial light, which I had not done before in many months. I would recommend Dr. Oren Oneal to any one suffering with weak or sore eyes.

Suffering was unbearable.

MRS. M. A. MARSH.

Pterygium and Granulated Eyelids Cured in Two Months

BOISE, IDAHO, Oct. 12.

Dr. Oren Oneal:—I will write to inform you that your treatment for my eyes has done me so much good. I can cheerfully recommend you to anyone who may be afflicted with pterygium and granulated eyelids. When I started with your treatment I could not see a person across the street to distinguish whether it was a man or a woman.

After two months' treatment I can see as well as ever. I talked with two oculists. They both told me the only cure for me was the knife.

1312 Tenth St. J. E. RICHARDSON.

Cataract Cured in Three Months

BRINSON, GA., Sept. 29.

Dr. Oren Oneal:—For months I have been groping about in semi-darkness, stumbling over everything in my pathway. I consulted an oculist and he pronounced my trouble cataracts. Through the persuasion of wife and friends, I concluded to try your treatment. After the first week I began to feel better. My improvement went steadily on, and within three months I was like a new man, and am extremely grateful to you. H. W. HERBERT.

Stenosis of Tear Duct Cured by Home Treatment

RIDGEWAY, MINN., Aug. 5, 1905.

Dr. Oren Oneal:—I feel it is due to your ability to acknowledged my obligations to you, inasmuch as you have cured my eye. The Dissolvent Treatment is so soothing and easy to administer. I often thought my eye would run out with the pain I endured. As soon as I began to use the Dissolvent Treatment all pain left my eye and it has never discharged any since. I have had several doctors examine my eye, but they have never done anything for it, only said I would have to have a tube put in the tear duct.

MRS. E. M. COOPER.

Granulated Eyelids Cured in Five Weeks

TOULON, ILL., April 2, 1905.

Dr. Oren Oneal:—When I began your treatment for my eyes, they had been granulated for several years. The balls were badly bloodshot, the lids swollen and they either itched, burned or smarted all the time and were always glued together in the morning. A great deal of the time it was impossible for me to read. After using your treatment five weeks, all these troubles are gone. My eyes feel comfortable and appear natural, and I can read every evening until bed time without any trouble.

GEORGE W. DEWEY.

Granulated Lids and Iritis Complicated with Cataracts and Paralysis of the Optic Nerve

CROWN POINT, IND., Sept. 15, 1905.

Dr. Oren Oneal:—You did what no other man in the world could have done. Four years ago you cured me of granulated eyelids, complicated with iritis, paralysis of the optic nerve and cataracts, restoring my sight after being almost blind six years, when many of the most noted oculists had said there was no hope for me. You saved me from a life of misery and hourly torture.

MRS. D. C. STEVENS.

W. L. Weber, Gen'l Supt. of the Household Sewing Machine Co. of Providence, R. I., Testifies

A complicated case

"I was born with cataracts on both of my eyes, and was treated when an infant. The treatment was successful with the left eye, but the right eye has always been blind and badly crossed. After having been in this condition for twenty-five years, I called to see Dr. Oren Oneal, and he straightened my eyes in a few minutes, entirely without pain or inconvenience, and removed the cataract by a short course of treatment. This was six years ago and the cure has been permanent."

Granulated Eyelids and Ulceration

KESWICK, IOWA, Jan. 1.

Dr. Oren Oneal:—When I commenced using your Dissolvent Method I was almost blind, due to the formation of films, caused by granulated lids and ulceration, and my eyes were at times so inflamed and painful that I got no rest day or night. Now they are free from pain, and I can read or do any kind of work I wish to do with my eyes, and it is only four months since I commenced treatment. I had tried a great many other physicians and never received benefit.

MRS. M. H. HARTZELL.

A Grateful Sister Testifies

ST. JOHN, WEST, N. B., CAN., July 12, 1905.

Dr. Oren Oneal:—With the deepest sense of gratitude, I write to inform you that my eyes are perfectly cured after your most successful treatment for optic nerve trouble.

Suffered eight years

I had suffered intensely for eight years, consulted many specialists, but the trouble only increased. I chanced to see your advertisement in a journal and was induced to write to you. I received such encouraging letters, that after some time I began your treatment In less than two weeks the pain had disappeared, and from that time the improvement continued until now, thank God, owing to your great skill, the disease has been entirely removed.

I wish every one similarly afflicted would try your treatment for I am confident if they adhere to your directions their cure is certain. I wish to thank you for the deep interest you have taken in my case.

If you wish to refer any of your patients to me, I shall be most happy to give them full particulars regarding my cure. In the meantime, please accept my best wishes in your regard, and thanking you again, I remain, Yours respectfully and gratefully,

St. Joseph's Convent. SISTER M. ANNETTE, Sister of Charity.

A Child Ten Years Old Cures Herself

GRAND RAPIDS, MICH., Aug. 17.

Dr. Oren Oneal:—Marguerite had been having trouble with her eyes for four or five years, and was wearing glasses to correct the trouble. She was growing worse, saw colors, saw double, and things looked so blurred to her that I was obliged to take her out of school. After using one month of your home treatment, I was astonished to find that she could read the very finest print readily, which, at the beginning of the treatment, she could not read at all. She used the treatment herself and is only ten years old.

284 Scribner St. MRS. J. A. RISEDORPH.

Iowa Woman's Eyes Cured

Dr. Oren Oneal:—I have been troubled with weak eyes all my life, and for the past five years have been rapidly losing my sight with paresis of the optic nerve. I have suffered with great pain in my eyes, at times so severe I would be nearly crazy. I was in such a condition that I could hardly distinguish an object even at a short distance. Although I only took treatment three months, I am permanently cured. I had a jerking and twitching of lids, had no control over them, they would drop and nearly cover the sight, had a smarting, itching sensation and a desire to rub them continually; felt as if sand were in them. I am happy to say drooping and all other painful symptoms have *entirely disappeared.* The pupils of my eyes were scattered over eyeballs, now they are normal. Right eye was smaller than left, has regained its natural size. I can now read or write by lamplight. When I commenced taking your treatment I could not use my eyes. I now use them eight or ten hours daily.

A complicated case

Box 462, Hamburg, Iowa. MRS. C. H. SWEETLAND.

Hemorrhage and Detachment of the Retina Cured

Dr. Oren Oneal:—Nearly fifteen years ago I ruptured blood vessels in the nerves of both eyes. Before the hemorrhage could be arrested the eyes filled with blood, causing detachment of the retina, obscuring the sight with the exception of a small circle on the outer edge of the retina. After treating with several oculists without material benefit and consulting a number of others, I was told that nothing could be done for me and that I would eventually become totally blind. I began treatment with you a little over a year ago, and the improvement has been so marked that I feel justified in testifying to your skill and the merits of your treatment. The blood clots have been almost entirely absorbed, my vision is becoming clearer every day and I am now able to read the daily papers with comfort and ease.

439 N. Park Ave., Austin, Chicago. M. D. FORREST.

Was Blind Forty-Two Years

DYERSBURG, TENN., March 12, 1902.

To whom it may concern:—This is to certify that I was born blind with cataracts on both eyes. In the year of 1887, when I was forty-two years old, Dr. Oren Oneal, the noted Chicago oculist, restored my sight completely.

His treatment was mild and caused me no inconvenience whatever. I had consulted many noted oculists and they had all told me I could not be cured. I am happy to say that my sight after these fifteen years remains as good as it was the day Dr. Oneal dismissed me cured. PETER KING.

Subscribed to and sworn before me this the 12th day of March, 1902. [SEAL.] TOM FERGUSON, Clerk Dyer County, Tenn.

Paralysis of the Optic Nerve Cured in Two Months

RICHLAND CENTER, WIS., Sept. 1.

Dr. Oren Oneal:—On June 22, I noticed a dark spot before my right eye, which bothered me a great deal. During the following week the spot became darker and a paralyzed feeling about the region of the eye, and in the next week the spot became so dark that sight was almost entirely gone.

I began treatment for paralysis of the optic nerve, and in only two months' home treatment found my sight completely restored. I did not experience the slightest inconvenience from the treatment. I am happy to say that the cure remains permanent.

MRS. HERMAN BURDICK.

Aged Divine Pays Tribute to Dr. Oneal

L. L. Carpenter, of Wabash, Ind., the well known Christian minister, who is noted for having dedicated over 1,000 churches in Indiana, Illinois, Ohio and other states, writes of Dr. Oneal as follows: "After a long and intimate acquaintance with Dr. Oren Oneal, it affords me great pleasure to say that he is an honorable gentleman and a very successful physician. Along the lines of his special work he has had great success, and I most cheerfully commend and recommend him to any one needing the services of a skillful oculist."

Cheerfully recommends

Mrs. Warren Cured of Cataracts

Among the large number of patients who have had sight restored by the Oneal Dissolvent Treatment, none is more enthusiastic than Mrs. E. A. Warren, of 3850 Indiana Ave., who had been growing blind for five years. Cataracts had formed on both her eyes. She could not see to read or sew and the little sight that was left her was of almost no value, because all objects seemed multiplied. She had consulted other oculists, but they told her that a surgical operation was the only chance of cure. She consulted Dr. Oneal and began taking his treatment several months ago. She noticed a gradual improvement, until now her sight is fully restored.

Mrs. Warren is a former resident of Evanston, having lived in the same house there for twenty-five years.—*Chicago Daily News.*

Eyes Sore Nine Years—Cured in Two Months

SPRINGVILLE, ALA., Sept 6.

Dr. Oren Oneal:—When I began using your treatment my eyes were in bad condition, with granulated eyelids and wild hairs. I used your treatment for two months and feel so grateful that I cannot express with words how thankful I am for the good you have done my eyes. My eyes have been sore for nine years; never could get anything to help them, but when I began your treatment they were better in three days. MRS. AMANDA TIDWELL.

Serious Case of Granulated Lids and Pannus Cured

MONROE, N. Y., April 6.

Dr. Oren Oneal:—My eyes were sore, watery and very much inflamed. My physician told me it was granulated eyelids and pannus, and that it was something very serious. I saw a specialist who told me there was no help or cure for me and that in time I would go blind, but he treated me and I continued to get worse all the time. My lids were so heavy I could not keep them open. The discharge from my eyes and nose was something terrible. I could hardly see to walk. After taking your treatment two months my eyes improved steadily and at the end of seven months the discharge was all gone, the redness also, and I can lift my eyelids and can see as well as ever. TIMOTHY P. SHEA.

Had been treated by others

Conjunctivitis and Optic Nerve Disease

KENDAIA, N, Y.. Aug 23.

Dr. Oren Oneal:—I am glad I can add my testimony, with others, to the skill of Dr. Oneal. I am relieved of my trouble with my eyes and my head. My sight has improved wonderfully. I can see well, but still wear glasses, for my eyes were very bad with congested optic nerve and catarrhal conjunctivitis, and I would advise all who have eye trouble to consult Dr. Oren Oneal.

Very sincerely yours,

Box 37. MRS. MARY SMITH.

Congested Optic Nerve and Conjunctivitis

SPREAD, GA., Sept. 12, 1905.

Dr. Oren Oneal:—I have been suffering since a school girl with congested optic nerve and conjunctivitis, caused from over taxing my eyes with hard study and reading. Was subject to severe headaches and had a drawing sensation above my eyes. After three months' treatment I can use my eyes constantly without inconvenience.

MRS. A. D. MCDONALD.

Granulated Eyelids and Congested Optic Nerve

(By Mrs. C. E. Morris, of Bristol, Conn., R. F. D. No. 1.)

I sat down and wrote a letter
To Doctor Oren Oneal
Telling him all about my eyes
Then how nervous I did feel
While waiting for the answer,
Which came all in good time.
The joy and cheer it brought to me
I cannot put in rhyme.
Now I can tell my suffering friends
Where they can find relief,
And bid them hope for brighter days
And not give up to grief;
And how for years I groped along,
Could not read much nor sew,
Until I tried those magic drops;
Now life seems all aglow.

Could Not Tell a Man from a Woman

WHIGVILLE, OHIO, Aug. 12.

Dr. Oren Oneal:—For seven years I have been afflicted with cataracts. I was so blind that I could not tell a man from a woman. I could not see to read nor sew, and now I have just taken three month's treatment, and can read and sew and see objects very plainly, and my eyes are sound and well.

Eyes sound and well

I write this testimony for the benefit of others. If it had not been for this wonderful cure I would have been blind. I can not say enough in its praise.

MRS. ELIZABETH ROSSITER

Saved from Blindness

MILWAUKEE, WIS.

Dr. Oren Oneal:—Four years ago my sight in my right eye failed. I went to one of the best oculists here, but was told that he could not guarantee a cure, as the ailment (optic nerve trouble) had become chronic. I felt that something must be done, for my right eye was almost blind and the left had become affected too. I took up your treatment and can say that you have saved my eyesight.

MISS JOHANNA SCHMIDT.
392 Seventeenth Street.

Cataracts of Twenty Years' Standing Cured

LOUDENVILLE, OHIO, Oct. 27, 1904.

Dr. Oren Oneal:—I had cataract on my left eye, of twenty years' standing, I consulted an oculist who told me it would give me lots of trouble. I tried your treatment, and in three months I found my eye as well and strong as ever.

Gratefully yours,
MRS. WM. COVERT.

Granulated Eyelids and Pannus Cured in Two Months

FINDLAY, OHIO.

Dr. Oren Oneal:—My eyes were in a terrible state for twelve years from granulated eyelids and pannus, during which time I have employed six doctors. Words will not express my gratitude for the good you have done in completing a cure in so short a time, it being accomplished in less than two months, where others have failed after twelve years' trial.

107½ Main Street. B. ROCKTE

Granulated Eyelids, Pterygium and Optic Nerve Trouble

DELIGHT, ARK.

Condition was critical

This is to certify that when I commenced using Dr. Oneal's treatment my eyes were in a critical condition from pterygium, granulated eyelids and optic nerve trouble. At times I could not tell one of my children from the other. Everything seemed to be in a fog or mist. But I am happy to say that my eyes are well after using only two months' treatment.

J A. KELLEY.

Paresis of the Optic Nerve Cured in Three Months

CALE, IND.

Dr. Oren Oneal:—My little daughter Georgia, seven years old, had been troubled for some time with her left eye and I began a correspondence with you in regard to it. You said, from the description I gave, that it was paresis of the optic nerve. I then had you send me one month's treatment, and after using this I could see a change for the better. I then ordered the second month's treatment, and after using that, she was cured.

WINEPARK FIELDS.

Sight Restored and Eyes Straightened

1246 East Ravenswood Park, CHICAGO.

Dr. Oren Oneal:—I was injured when about fifteen years old, which caused my eyes to turn out badly, and also resulted in blindness of the right eye. I am happy to say that you not only straightened my eyes perfectly and painlessly, but your treatment has restored my sight so that my vision is now perfect.

MRS. CHARLES T. SLEEPER.

A Word to the Afflicted

At work in Laboratory

Those who wish to do so may come and have an examination of their case made in my office. A talk will cost you nothing. Most eye troubles can be successfully treated at home, as the testimonials in this book will prove. If your case is in my opinion incurable I will frankly tell you so. **Do not send any money** until you receive my professional advice.

Location of Offices

My offices occupy the entire second floor of the Athenaeum Building, 48, 50, 52 and 54 Dearborn Street, near Randolph Street, one square west of Masonic Temple. Easily reached from all parts of the city by the electric, cable or elevated cars. Those who wish to come to my office should notify me if possible, thus preventing too much delay in my waiting room.
